## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29, drawn to a composition (herbal) for oral hygiene comprising extract from *Heliopsis longipes* root in an amount sufficient to promote oral hygiene, and/or local anesthesia, and/or desirable sensations to the oropharynx, and a carrier therefore, classified in class 424, subclass 725.
- II. Claims 30-40, drawn to a method for promoting oral hygiene, comprising contacting the oral cavity with a herbal composition including an extract from *Heliopsis longipes* in an amount sufficient to promote oral hygiene, classified in class 435, subclass 410.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product. For example, the product as claimed can be used as a pesticide and further may be used alternatively as local anesthesia. Thus, although the extract may be required by both inventions its use and application may be quite different and distinct. One way distinctness is present between

Art Unit: 1651

the two inventions, and a serious burden is placed upon the examiner to search for all of these different and distinct uses.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah K. Ware whose telephone number is 308-4245. The examiner can normally be reached on 9:30-6:00.
